

Using the Auto flow tool is a quick way of inserting images into a template that you can Then go back and modify individual images. The first thing you need to do is to have the Template you wish to use loaded and all of your images loaded, then click the Auto flow tool

When you click the tool it will automatically start to place the images, this can take a few Minutes depending on the amount of images to be placed and how large the images are.

Now all of the images have been placed you can go through and modify each one By using the tools on the right hand side.
